

INVESTOR & ENTERPRISE BRIEF

mAI Society

The Autonomous AI Operating System for Residential Communities

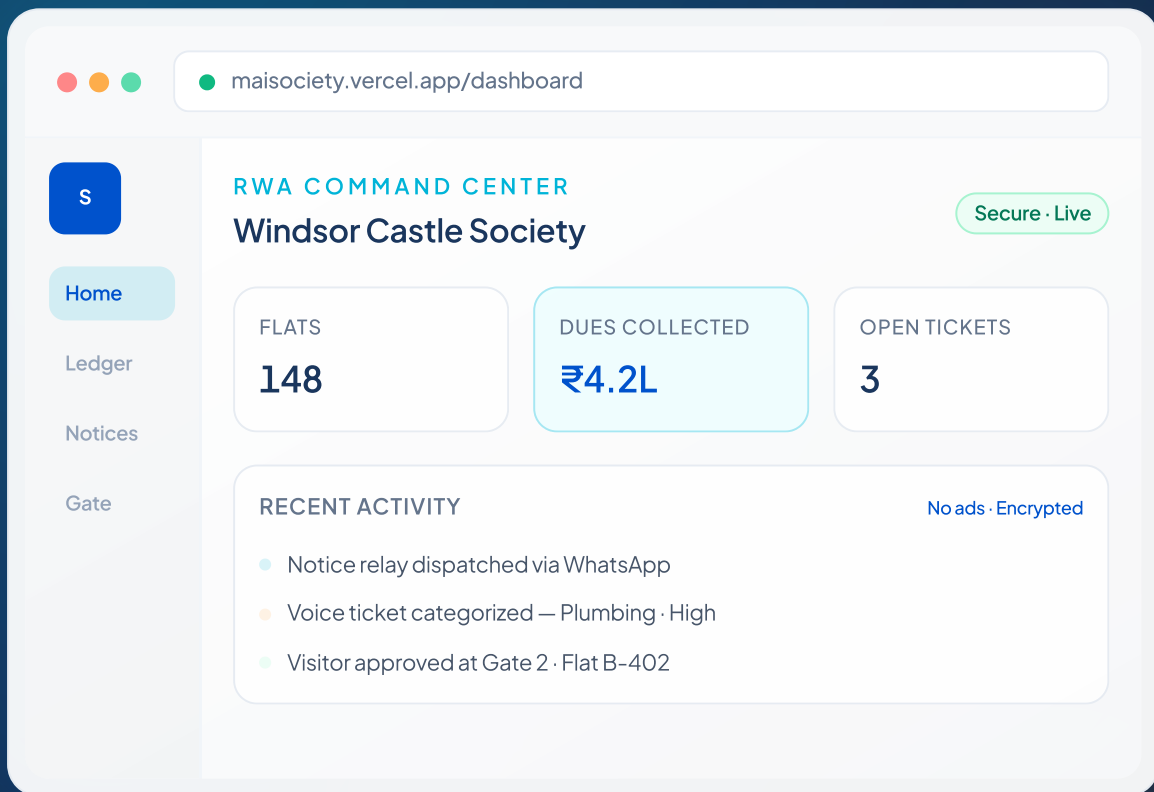

Zero-hardware society intelligence — governance, security, finance, sustainability, and property syndication in one modular platform.

Per-society licensing

No IoT hardware

Encrypted by design

AI-native modules

Clarity before scale.

Housing communities still run on fragmented apps, paper workflows, and expensive hardware. mAI Society replaces that stack with an AI operating system designed for Indian RWAs — modular, auditable, and hardware-free.

PROBLEM

Opaque ledgers, weak gate ops, no AI, and vendor lock-in from sensor-heavy platforms.

SOLUTION

One OS for residents, guards, and admins — WhatsApp AI, gatekeeper, finance, green, and resale.

VISION

Every society runs on autonomous intelligence: safer gates, clearer money, greener campuses.

MISSION

Modularize India's housing infrastructure with enterprise software that feels premium and private.

VALUE PROPOSITION

Activate once. License per society. Stack AI modules without IoT CapEx.

Traditional society software is fragmented.

Most platforms optimize for notices and dues — not autonomous operations. Hardware vendors, opaque finance, and disconnected resident channels create cost and trust debt.

Expensive hardware

Sensors, kiosks, and lock vendors inflate CapEx and SLA risk.

Poor governance

Paper elections, weak recall, and unread rulebooks.

Financial opacity

Spreadsheets hide leakage until audits fail.

Lack of AI

No predictive expense, plant, or spatial intelligence.

No sustainability

Landscape and compost stay offline and unmeasured.

No interoperability

Gate, chat, billing, and listings never share one graph.

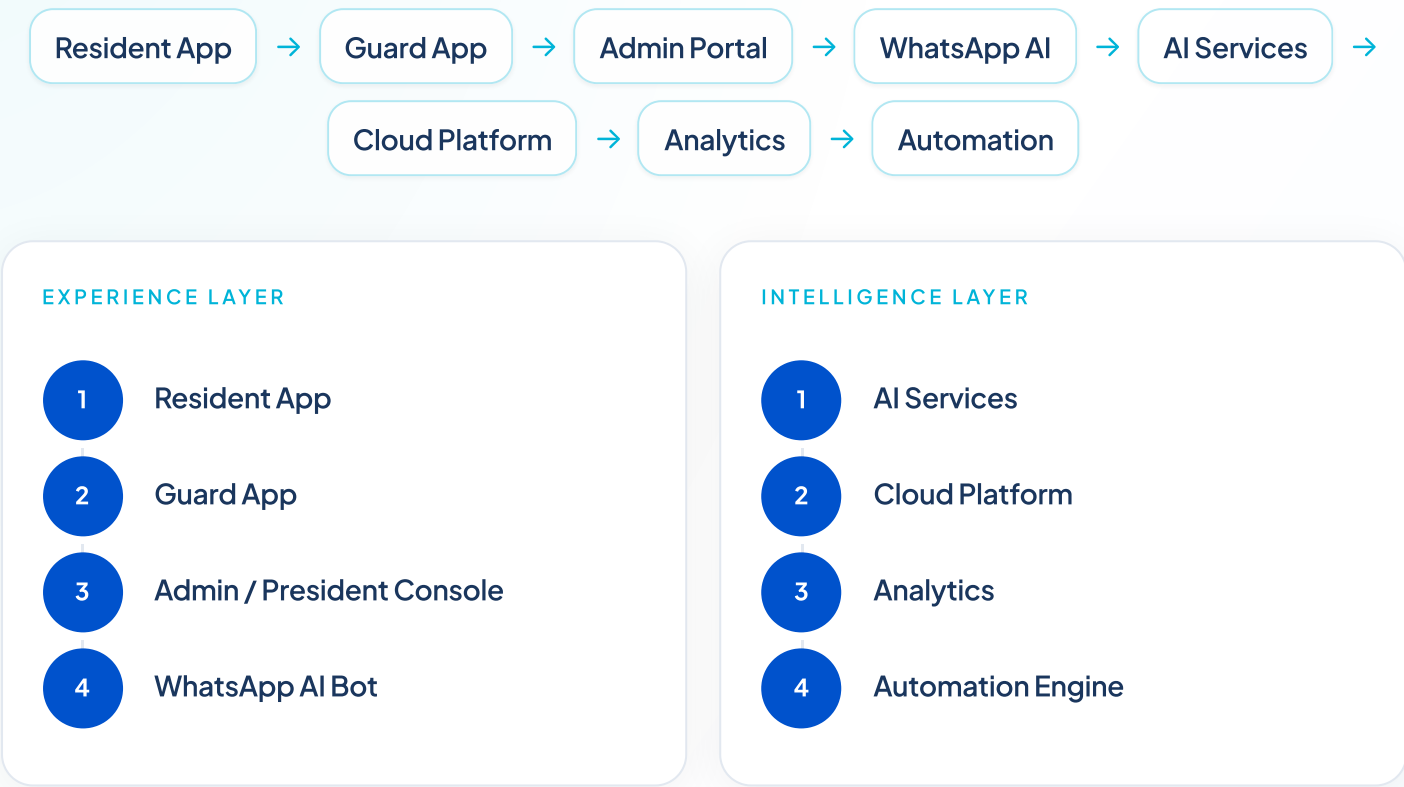

Why legacy platforms cannot evolve.

The gap is architectural — not marketing. Legacy stacks bolt features onto dues engines. mAI Society is built as an AI OS with per-society licensing and zero hardware dependency.

CAPABILITY	LEGACY PLATFORMS	MAI SOCIETY
Hardware model	Sensors / kiosks common	Software-first, zero IoT required
Intelligence layer	Rules & reports	AI modules across ops, finance, green, space
Licensing	Site-wide bundles	Per-society modular activation
Resident channel	App-only or SMS	App + WhatsApp AI + gate workflows
Trust signals	Manual certificates	RWA badges, dues clearance, audit trails
Extensibility	Monolith upgrades	Composable premium modules

One ecosystem. Every role.

Residents, guards, and administrators share one society graph — extended by WhatsApp AI, cloud services, and an automation engine.

Gate operations without hardware locks.

Universal Delivery

Pre-clear Swiggy, Zomato, Amazon, India Post, and local couriers in one tap.

QR Visitor & Staff Passes

Time-window staff QR passes and visitor approvals with exit trace.

Kid Safety

Parent pre-approvals and loud alerts for unaccompanied minor exits.

Vendor Tracking

Daily service scoring rolls into vendor SLA compliance.

Tenant Lifecycle

Lease upload, RWA digital sign-off, and police-ready tenant records.

Emergency SOS

1-tap medical & security dispatch to guards and volunteers.

Transparent democracy for RWAs.

Digital Elections

1-Flat-1-Vote secrecy, live turnout, scheduled result reveal.

Committee Recall

Cryptographic recall motions for committee accountability.

AI Rulebook

Society guidebook lookup via helpdesk and WhatsApp.

WhatsApp Automation

24/7 resident queries for dues, notices, and bylaws.

Transparent governance

Ballots stay anonymous. Ledgers stay auditable. Notices stay searchable. Committees stay accountable — without paper booths or private chat groups as the system of record.

See leakage before the audit.

HEALTH INDEX

0–100

Society Health Index

ANOMALY CLASSES

4+

Water · Power · Vendor · Repair

LEDGER POSTURE

Audit-ready

Per-flat dues & receipts

mAI Auditor

Predictive financial leakage & invoice anomaly scoring.

Vendor Verification

SLA ratings feed monthly compliance audits.

Expense Prediction

Forward-looking utility and repair signals.

Leak & Fraud Detection

Variance alerts across categories.

Utility Analytics

Water & electricity pattern intelligence.

Collections Clarity

Tiered per-flat billing with activation fees.

Neighbors, not strangers.

maiCommute

Zero-commission in-society carpool with verified flats.

BLE Asset Mesh

Community mesh to locate lost phones, keys, and vehicles.

Emergency SOS

High-contrast dispatch with flat location for responders.

Smart Parking

Visitor bays from out-of-station status — zero IoT sensors.

Neighbour Network

Marketplace, surveys, gallery, and shared amenities.

Guardian Mesh

Kid/senior geofence and unauthorized vehicle motion alerts.

Landscape that reports itself.

mAI Botanist

AI plant doctor diagnostics and weather-aware task dispatch.

QR Trees

Tag botanical assets with carbon offset estimates.

Compost

Batch inventory and doorstep organic compost delivery.

Tree Adoption

Residents sponsor society trees by flat.

Carbon Impact

Species-aware offset metrics for campus greening.

Plant Swap

Hyperlocal cuttings, pots, seeds, and saplings exchange.

Spatial & interior AI engine.

Residents upload a room photo, enter viewing distance, and receive TV sizing, sofa layout, acoustics, and walkway guidance — then connect with RWA-verified interior partners.

ROOM ANALYSIS FORMULA

$$\text{TV inches} \approx (\text{viewing distance ft} \times 12) / 1.6$$

Snapped to retail sizes: 43" · 55" · 65" · 75"

TV & sound sizing

Optimal display inches plus soundbar vs surround guidance.

Furniture fit

L-shaped vs 3-seater with 30–36" walkway rules.

Lighting moods

Warm 2700–3000K layering for living rooms and bedrooms.

Vendor matching

1-tap leads to decorators, woodcraft, electronics, lighting.

Residential property exchange.

One-click dual engine for rent and resale. Owners publish once; mailList syndicates across top portals and broadcasts to society investor networks — zero brokerage.

Resale syndication

MagicBricks Resale

99acres Resale

Housing.com

NoBroker Seller

Verified RWA Resale Certificate

Maintenance dues clearance · society security score · NOC status · zero brokerage marketplace

Enterprise stack, society-scoped.

Frontend

React · Vite · Tailwind · Capacitor Android shell

Backend / Cloud

Supabase · Next API routes · Vercel delivery

Database

Postgres with multi-tenant RLS per society

Authentication

Supabase Auth · role scopes · feature licensing

AI Services

Auditor, botanist, space, mediation, recall engines

Notifications

Push · WhatsApp routing · in-app alerts

BLE / Mesh

Asset finder & guardian presence signals

Maps & Ops

Gate zones, SOS location, society signal maps

Analytics

Health index, SLA, monetization lead boards

Recurring by design.

- 1 Platform subscription — activation + tiered per-flat rates
- 2 AI / enterprise modules — WhatsApp, elections, auditor, green, space, mailList
- 3 Marketplace & property — interior leads, rental/resale syndication monetization
- 4 Future fintech & insurance — society-scoped financial products

Strengths that compound.

Category players excel at dues or visitors. mAI Society competes on OS breadth — AI modules, zero hardware, and trust-native governance — without naming rivals as the product story.

DIMENSION	TYPICAL CATEGORY TOOL	MAI SOCIETY STRENGTH
Scope	Billing or gate only	Full AI OS across ops → green → property
Hardware	Often required	Explicitly zero-hardware
AI depth	Chatbots / reports	Auditor, botanist, space, recall, mediation
Licensing	Bundle pricing	Modular per-society activation
Channels	App silo	App + guard + WhatsApp + syndication
Trust	Manual paperwork	RWA badges, cryptographic votes, RLS

From one society to a housing nation.

NOW

Premium RWAs & mid-large societies on modular SaaS.

NEXT

Builder townships and multi-society portfolios.

HORIZON

Campuses, retirement communities, government housing.

Same schema. Same RLS. New society graph — expansion without re-architecture.

Six principles. One platform.

Zero Hardware

Software replaces sensor CapEx.

AI Native

Intelligence is a product layer, not a chatbot add-on.

Transparent

Votes, ledgers, and badges that residents can trust.

Modular

Activate only what each society needs.

Scalable

Multi-tenant by design — society to portfolio.

Future Ready

Property, green, space, and fintech adjacency.
